**G2000 HARRIER**  
Created in Italy by Gentili

---

***THE ALL NEW G2000 HARRIER***  
*the safest and original ladder rack*

---

*Gentili have been supplying customers world-wide with the G2000 – a product which has gained a reputation for its robustness and quality since its launch over 20 years ago, when the first hydraulic ladder rack for LCV's was designed and launched by Gentili.*

*As an ISO 9001 company, Gentili have a firm commitment to continuous improvement. The G2000 has been constantly updated and this new G2000 Harrier is the most recent dynamic enhancement to the product.*

*As with all the G2000 products gone before, the Harrier is designed and manufactured in Italy and brings together the wealth of knowledge and time-served experience Gentili have in this market.*

*The G2000 Harrier is designed to utilise the original roof mounting points. The design improvements bring together quality and style with a touch of Italian flair.*

***Reduce risk, reduce cost***  
***THE NEW G2000 HARRIER***  
***stretch free, strain free***

# ERGONOMICALLY DESIGNED

*reducing risk through innovation*

*The G2000 Harrier offers a fully assisted ladder mounting and deploying system therefore becoming the ideal partner for customers looking to equip their vehicles with a safe and easy to use solution.*

*Due to its design, the G2000 Harrier offers an easy glide, single person operation. All actions are carried out*

*by the operator with their feet on terra firma at all times, being equipped with a precision engineered hydraulic system consisting of a counter balance mechanism and shock absorber.*

*Through 20 years of active use and continual improvement the G2000 Harrier is the most advanced and safest system of its type available.*

# INCREASED FLEXIBILITY

*The new G2000 Harrier will carry most ladder types available on the market.*

*Fitted with anti-slip and anti-vibration rubber trims.*

*New, improved and adjustable ladder retainers to hold the ladder firmly in position.*

## LIGHTWEIGHT DESIGN

Main structural parts made from anodised aluminium.

## NEW DESIGN

The new design offers improvement to quality and style.

## UNIVERSAL INSTALLATION

The system can be fitted onto any light commercial vehicle on the market, fixing through the original roof mounting points.

## IMPROVED AERODYNAMICS

New profiles designed to be safe, strong and low profile; reducing both wind noise and fuel consumption.

## DURABLE MATERIALS

Main parts made from anodised aluminium, offering maximum protection from corrosion and offering minimal maintenance. Stainless steel parts offering strength and extended longevity.

## SECURE

Ladders are safe and secure when the vehicle is in motion.

## DOUBLE LOCKING

Not one, but two independent securing catches lock the system in place; making it safe when the ladder rack is stowed on the vehicle when it is moving. This feature, invented by Gentili, has been part of the G2000 design from the first prototype made over 20 years ago.

## TÜV GS & CRASH TEST

Gentili take safety seriously - the G2000 Harrier is TÜV tested and certified and has been crash tested to a 20g force on a vehicle shell.

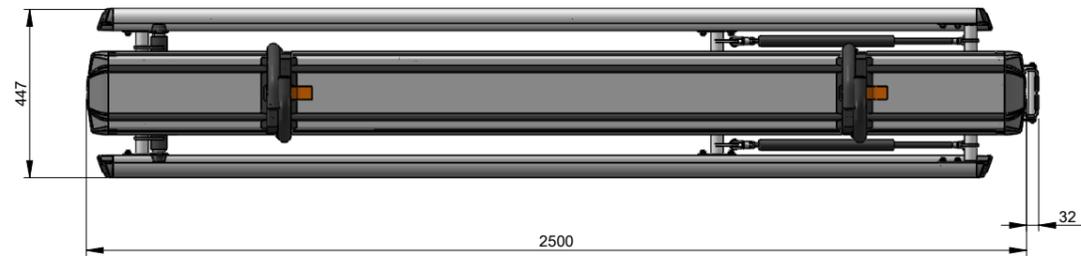

# Technical specifications

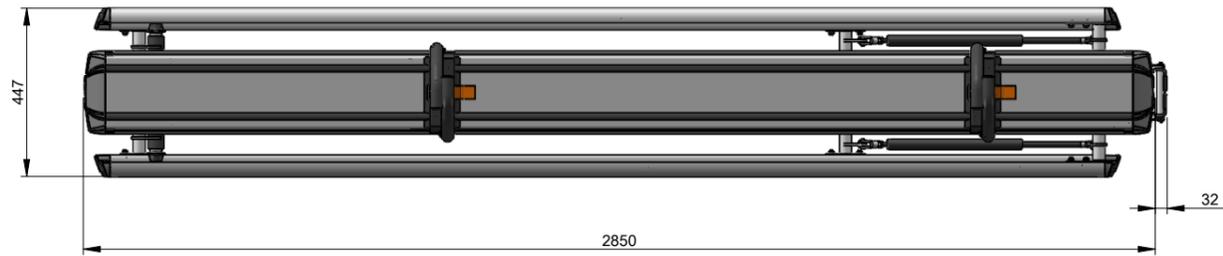

- G2000 Harrier Type 1 weight 36 Kg
- G2000 Harrier Type 2 weight 38 Kg
- G2000 Harrier Type 3 weight 42 Kg

Safe maximum ladder weight 60 kg  
 TÜV GS certified  
 20g Crash tested according to ECE R17

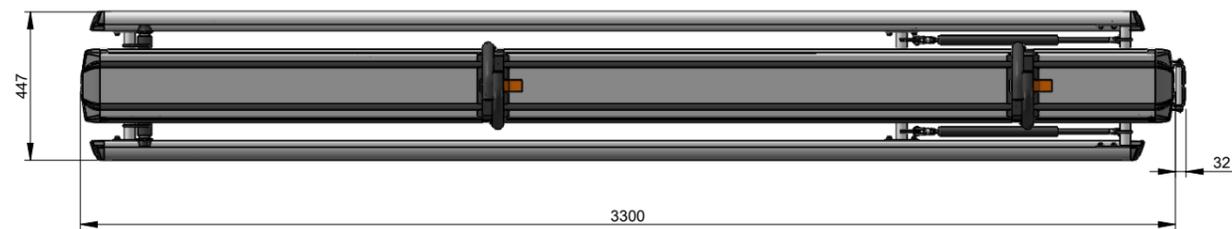

- G2000 Harrier Type 1

- G2000 Harrier Type 2

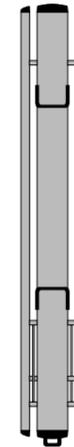

- G2000 Harrier Type 3

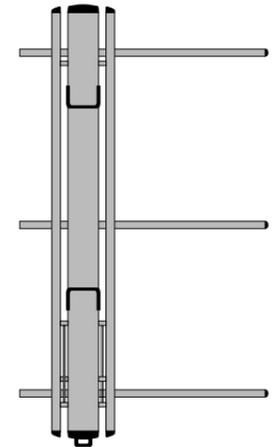

# Available versions

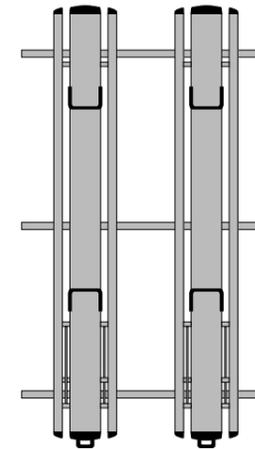

Single G2000 Harrier

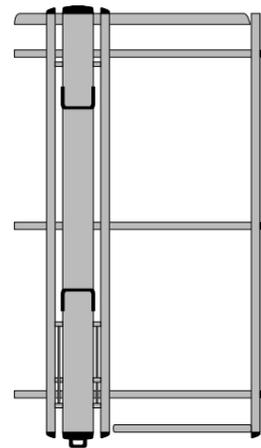

Single G2000 Harrier supplied with Gentili roof mounting bars

Double G2000 Harrier supplied with Gentili roof mounting bars

Single G2000 Harrier with Gentili roof mounting bars, side rail kit, rear roller and front spoiler

LADDER LOCK is an anti-theft device that can be adjusted to suit different ladders (available as an accessory).

\* padlock not supplied
